Abstract (en)
[origin: CA3022130A1] A method of manufacturing wall elements for buildings, wherein cross laminated timber panels of a specific width and length are stocked in a store, and wherein the panels are sawed up transversely to the longitudinal direction to obtain cross laminated timber panels of the same width and smaller length, wherein a plurality of panels are placed onto a conveying track transversely to the direction of running, and indeed such that the panels are flush at the top and bottom and the side edges of consecutive panels contact one another; in that the panels on the conveying track are connected along the contacting longitudinal sides to form a cross laminated timber apron; and in that the apron is sawed up transversely to the direction of running of the conveying track to obtain cross laminated timber boards of a defined width.
