Abstract (en)  
Offset printing machine and corresponding printing method. For printing ink on a laminar substrate, comprising a horizontal roller (1) comprising a hollow cylindrical body (2) the outer surface (3) of which is configured to receive said substrate and is arranged facing a light source for drying said ink on said substrate, said roller (1) having a first end (101), a second end (102) and an axis (100), and where said roller (1) is secured at said second end (102) to rotation means configured for causing said roller (1) to rotate about said axis (100) in both directions of rotation, wherein that said cylindrical body (2) has cooling conduits (4) provided under said outer surface (3), extending along said cylindrical body (2), and with a coolant fluid circulating through them when said machine is in use.
