Abstract (en)

[origin: EP3480162A1] The present invention relates to an interactive beer dispensing device (1), comprising a column (8) which is equipped with beer dispensing means (4, 5) and suitable for connection, through the lower part thereof, to a source for the storage of beer, comprising a safety casing (2) equipped with one or more housings (3') provided with means for insulation with respect to the dispensing column (8). Likewise, the device (1) comprises one or more touch screens (3) which are integrated in the housings (3') of the dispensing column (8) and connected to processing means suitable for reproducing multimedia content. The invention therefore provides interactive functionalities as a result of the integration of the touch screens (3), with a high degree of safety of the internal elements of the dispensing device (1) as a result of the insulating internal housings, the external casing (2), and the separation of the touch screen (3) and the electronic accessories thereof from the dispensing column (8).
