Abstract (en)

A first mobile device (102) connects with a second mobile device (104) via a wireless connection (106). The first mobile device (102) associates the mobile device (102) with a first audio channel and associates a second audio channel with the second mobile device (104). The first mobile device (102) transmits the second audio channel to the second mobile device (104) for output by the second mobile device (104). The first mobile device (102) outputs the first audio channel. The first mobile device (102) operates as a source device for the audio channels.
