Abstract (en)
[origin: WO2018011203A1] The invention proceeds from a portable power tool device having a drive unit (12a; 12b; 12c) which has at least one drive shaft (14a; 14b; 14c), and having at least one rotary percussive mechanism (16a; 16b; 16c) which has at least one intermediate shaft (18a; 18b; 18c) oriented at least substantially in a manner aligned with the drive shaft (14a; 14b; 14c), and having at least one bearing (20a; 20b; 20c) for supporting the drive shaft (14a; 14b; 14c). It is proposed that the bearing (20) be arranged at least partially in a plane (22a; 22b; 22c) intersecting the intermediate shaft (18a; 18b; 18c), said plane (22a; 22b; 22c) extending at least substantially perpendicularly to the intermediate shaft (18a; 18b; 18c).
