Abstract (en)

[origin: WO2018010726A1] The invention relates to a method for producing a layer arrangement for a security document, comprising the following steps: providing a semifinished product comprising a layer arrangement (1) including a stack of layers that consist of a plastic material; producing a print image (2) on an outer layer of the layer arrangement (1), said print image (2) being printed by means of a printing device and being produced such as to have image imperfections (14) individualizing a security document; and producing an inner image print, an additional layer that consists of a plastic material being applied to the outer layer in such a way that at least the image print (2) is covered by the additional layer, the inner print image having the image imperfections (14) being viewable from the outside from a front and/or rear of the layer arrangement (1) through at least one of the layers. The invention also relates to a security document.
