Abstract (en)
[origin: WO2018041662A1] The invention relates to an information method and an information system for outputting at least one exit-related information (106, 110) in a rail vehicle (10). The information method comprises: determining (B) a location of a mobile output device (50) inside of the rail vehicle (10). The information method is characterized by providing (C) the exit-related information (106, 110) by means of the output device (50) depending on the location.
