Abstract (en)

[origin: WO2018007755A1] Facility for traceability of a sequence of operations relating to the observance of hand hygiene rules by at least one operator (OP) in a monitored area (C) accessible by a door (P), and comprising: - at least one portable personal identification module (1) worn by at least one operator (OP); - at least one hygiene station (2) comprising a use detector and a communication module; - a door identification module mounted in the lower part of the door; - a single ground antenna (3) shaped to detect said door identification module during opening/closing of the door (P) - an electronic unit (4) incorporating a control unit connected to the antenna and designed for identifying the personal identification module and the door identification module, and a communication unit communicating with the communication module of the hygiene station.
