Abstract (en)

[origin: CN109744607A] The invention relates to a garment product having a belt (3) equipped with at least one sheath (5) extending over at least a portion of said belt. The sheath comprises a front lateral slit (6), an elastic strap (7) is mounted in the sheath, the strap has a portion attached to the belt (3) and a front portion equipped with a tab, the tab is mounted in the slot (6) slidably goes through the slot by elastic stretching of the strap, the garment product further comprises tightening means for clamping the belt (3) by moving and fixing the tab out of the slot, and the strap (7) is equipped with an inextensible element (12) whose length is defined to limit the maximum stretch of the strap.
