Abstract (en)
[origin: EP3482944A1] A printing apparatus 500 is provided with a moving unit 550 used to convey a can body 10. In addition, the printing apparatus 500 is provided with a first linear unit 610 in a linear shape which the moving unit 550 travels to move in one direction. Moreover, the printing apparatus 500 is provided with a second linear unit 620 which the moving unit 550 travels to move in a direction opposite to the one direction, the second linear unit 620 being arranged in parallel with the first linear unit 610 and formed linearly. Further, the printing apparatus 500 is provided with a printing unit 520 that performs printing on the can body 10 held by the moving unit 550. By these units, the miniaturization of a printing apparatus and a can body manufacturing system is attained.
