Abstract (en)
A crane-style arcade game has an enclosed prize chamber wherein the prizes comprise RFID tags with assigned point values, an RFID reader reads the RFID tag on a captured prize as the captured prize is moved past the RFID reader. A recording device is connected to the RFID reader to record the assigned point values of the RFID tags of captured prizes read by the RFID reader. A rotary table mechanism is used to move a captured prize past the RFID reader and then to a storage area below the enclosed prize chamber.
