Abstract (en)

[origin: WO2018010870A1] The invention relates to an arrangement (2) for fuel injection systems for joining a fuel injection valve to a fuel-conveying component (3), which arrangement comprises a retaining part (7) which serves for mechanical fastening and a connector part (8) to which the fuel injection valve can be connected hydraulically. A joining part (9) is provided, by means of which the connector part (8), which can be joined to the fuel-conveying component (3), can be joined to the retaining part (7).
