Abstract (en)

[origin: WO2018011415A1] The invention relates to a method for mounting a plug connector (1), comprising a contact carrier (30), which is designed to receive at least one contact partner (22) that is arranged on an electrical conductor (21) of a cable (20), wherein the contact carrier (30) is inserted in an outer housing (40). The invention is characterized in that the contact carrier (30) is provided with a latching lug (31) for fixing the at least one contact partner (22) in the contact carrier (30), and at least one latching hook (32) arranged at the end thereof and acting on the cable (20). Both the latching lug (31) and the at least one latching hook (32) are moved from an initial position into a functional position whenever the contact carrier (30) is inserted into the outer housing (40).
