Abstract (en)
[origin: EP3485765A1] The present invention relates to a computer desk comprising a desk top, a framework, at least two legs, and at least two leg supporting base. The framework is joined to the underside of said desk top. The legs connect with the framework and are supported by said leg supporting bases. The desk top comprises a desk top base and a desk cover. The desk top base is comprised of at least two individual desk sections which fit together to create a flat surface. The desk top base includes at least one hole such as to allow cords to pass through or a monitor stand to be mounted. The desk cover is fitted to sit completely over said desk top base. The desk cover includes at least one slit such as to allow cords to pass through or a monitor stand to be mounted. The at least one slit is aligned with said at least one hole in the desk top base.
