Abstract (en)
[origin: US2019153713A1] The invention relates to a flush toilet with a toilet unit comprising a toilet bowl, and a flush water outlet via which flush water is delivered into the toilet unit, wherein the flush water outlet is arranged asymmetrically relative to an imaginary centre line, which extends essentially centrally from a front end of the toilet unit facing a user during the flushing operation to an opposite rear end of the toilet unit, in a rear lateral region, in particular in a rear lateral corner region, of the toilet bowl.
