Abstract (en)
The present invention provides a fuel cell module (1) including a fuel cell stack (2) having a plurality of fuel cells (2a); a reformer (36) that generates fuel gas by reforming raw fuel gas; a combustor (38) that combusts remaining fuel gas and thereby heats the reformer; and a housing (6) that houses the reformer and the combustor. The fuel cell stack is arranged outside the housing independently from the housing.
