Abstract (en)

[origin: WO2018020526A1] The invention relates to an apparatus and a process for spraying glue on shoe components. The apparatus comprises a first nozzle (2) adapted to spray a jet of glue (20) towards said portion of shoe (100), a shielding element (3), adapted to intercept said jet of glue (20) to define a limit line (30) for the distribution of the glue on said shoe (100), and at least one additional nozzle (4 ) facing said shielding element (3) and adapted to direct a jet of fluid under pressure (40) towards the same shielding element (3) to interact with any glue residue present therein.
