Abstract (en)

[origin: JP2019100336A] To provide a vacuum pump which is easy to handle and which can be lifted, oriented and/or assembled, and to provide arrangement, an apparatus or a method for handling and/or assembling the vacuum pump.SOLUTION: A vacuum pump (111), in particular, a turbo molecular pump is provided that comprises a pump body, and a fixing device formed thereon, the fixing device comprising at least one engagement structure (225) for connecting a fixing element (237) to the pump body, wherein the engagement structure (225) extends at least partially at the outer circumference of the pump body at a certain angle relative to a longitudinal extension (227). A position and/or arrangement of the fixing device along the longitudinal extension of the pump body are selected according to a weight gravity center (229) of the pump body.SELECTED DRAWING: Figure 1

Abstract (de)

Vakuumpumpe, insbesondere Turbomolekularpumpe, mit einem Pumpenkörper und einer daran ausgebildeten Befestigungsvorrichtung, die zumindest eine Eingriffsstruktur zur Verbindung eines Befestigungselements mit dem Pumpenkörper aufweist, wobei die Eingriffsstruktur am Außenumfang des Pumpenkörpers zumindest abschnittsweise unter einem Winkel zu dessen Längserstreckung verläuft, wobei eine Position und/oder Anordnung der Befestigungsvorrichtung entlang der Längserstreckung des Pumpenkörpers in Abhängigkeit des Gewichtsschwerpunkts des Pumpenkörpers gewählt ist.
