Abstract (en)

[origin: EP3489919A1] An apparatus (2) has a sound detection unit (20) configured to detect a sound signal in an environment of a user. The apparatus (2) has a processing unit (30) configured to determine whether the detected sound signal is indicative of an emergency situation in the environment of the user. The apparatus (2) also has a haptic output unit (22) configured to output a haptic signal when the detected sound signal is indicative of an emergency situation in the environment of the user.
