Abstract (en)

[origin: WO2018019739A1] The invention concerns a device (10) for packaging a cosmetic product (P), in particular a solid or pasty cosmetic product, comprising a base (20), an intermediate part (30) intended to carry the cosmetic product (P) and a lid (40), the intermediate part (30) being fixedly mounted to the base (20) and the lid (40) being hingedly mounted on the intermediate part (30) such that said lid (40) occupies two positions, a first position, referred to as the closed position of the device, in which the base (20) and the lid (40) define a substantially closed space between them, and a second position, referred to as the open position of the device, in which the lid (40) is retracted into the base (20), in which said lid (40) is configured to be locked in the open position - or, vice versa, in the closed position - by locking means comprising at least one protrusion (39) of material projecting from the intermediate part (30).
