Abstract (en)

[origin: WO2018020042A1] The present invention is drawn to a method for in vitro predicting the risk for a patient to present a pathology or to identify whether a patient is at risk to develop a pathology, such as psychiatric disorder, associated to an alteration of A-to-I editing on PDE8A transcripts, from body fluids such as a blood, urine or saliva sample of said patient. The present invention also relates to kits for the implementation of the method.
