Abstract (en)
[origin: WO2018019408A1] The invention relates to a hand-guided soil compaction machine (1), in particular a vibratory tamper or vibration plate, having a superstructure (3), a drive device (4) arranged on the superstructure (3) and having at least one drive shaft (10, 15, 20), a substructure (5) having a compaction plate (7, 8) driven by the drive device (4), and a sensor device (25) comprising an acceleration sensor for determining the soil rigidity of a soil to be compacted, wherein the sensor device (25) is supplied with electrical power, in particular solely, by a generator (26) driven by the at least one drive shaft (10, 15, 20).
