Abstract (en)

[origin: WO2018019589A1] The invention relates to a flap device (292) for opening and closing a wastegate channel (291) in a turbine housing (21) of a turbocharger (1), comprising a lever element (51), which has a through-bore (52), in which a cylindrical bush (59) is arranged; a flap (53) having a pin (54), which is arranged on the lever element (51) in such a way that the pin (54) is led through the bush (59); and a cover disk (55), which is arranged on a side opposite the flap (53) and has an opening (66), through which the pin (54) of the flap (53) is led; wherein the flap (53) is riveted to the lever element (51) by means of the pin (54). The invention further relates to a turbocharger (1) and to a method for production.
