Abstract (en)

[origin: WO2018019640A1] This method for controlling the display of at least one image on at least one screen (2) of a terminal (1) associated with means (4) for viewing a scene, is characterised in that it comprises a step of establishing a reference display configuration in which the display of the image is associated with the view of the scene output by the viewing means, and a step of detecting changes in the view of the scene output by the viewing means, in order to accordingly control changes to the display of the image on the screen.
