Abstract (en)

[origin: WO2018024974A1] The invention relates to a calibration device (30) comprising a sound pick-up system (31) comprising microphones (40) connected to an audio signal processing device (34), the calibration device further comprising an enclosure (32) at least partially containing the processing device, a sound generator (36) connected to the processing device, and a microphone support (44) capable of keeping the microphones at the same distance from the sound generator.
