Abstract (en)
The present invention relates to an annular member (4) for a container, including a stop ring (110) and a seal ring (120). The stop ring (110) includes a ring body (112) and a stopper (111) extending from the ring body (112) towards the center of the annular member. The stop ring (110) and the seal ring (120) are formed in one piece by bi-injection molding. The present invention also relates to a cosmetic package including said container, and also relates to a producing method of the annular member.
