Abstract (en)

[origin: US2019166997A1] A carriage for a guide system, wherein the carriage has a running cage, wherein the running cage has a cage middle element and two lateral cage side elements, wherein the cage side elements, lying opposite each other and spaced apart from each other, are each connected to the cage middle element, wherein a plane of extent of a cage side element is at an angle to a plane of extent of the cage middle element. The carriage is characterized in that the planes of extent of the cage side element and of the cage middle element enclose an angle of less than 90°.
