Abstract (en)
A golf practice putter is disclosed. A golf practice putter according to the present disclosure includes a putter head coupled to a lower end of a shaft and having a putter face and a hitting member selectively coupled to the putter head, wherein a through hole is formed in the putter head to be stepped such that a fastening bolt pass through the through hole upwards from a bottom face of the putter head, and a cutout portion is formed in the putter face corresponding to the through hole to open a portion of an upper face of the putter head in a hitting direction, and wherein the hitting member is formed in a shape of a golf ball, a seating face seated on the upper face and supported by an edge of the upper face and a support face are formed to be stepped in a bottom face of the hitting member, a screw-fastening groove is formed in the seating face such that the fastening bolt is coupled to the screw-fastening groove, and the hitting member is interchangeably coupled to the putter head by the fastening bolt in a state in which the hitting member is seated on the upper face such that a part of the hitting face protrudes beyond the putter face through the cutout portion.
