Abstract (en)

[Object] To provide a trading card game that prevents the game progress from becoming monotonous.[Solution] A game toy played with a first player and a second player includes a play field configured such that a first placement region that is provided for each of the players and that allows a physical game component associated with a game element to be placed thereon is visually identifiable and an indicator configured to indicate which one of the players currently takes their action turn during game progress. The indicator includes a marker movable in accordance with at least one of placement of the physical game component in the first placement region and use of the physical game component during game play, and the indicator indicates which one of the players currently takes their action turn by using a position at which the marker is placed.
