Abstract (en)  
[origin: US2019169776A1] The subject matter of this invention is a heat distribution management device in a treatment device of wires in movement on a means of transport, said means of transport being able to be traversed by a flow of heat at or through the of orifices, characterized in that the device comprises at least one means of sealing by coverage of at least one part of the orifices of the means of transport, said means of sealing being independent of the means of transport.

Abstract (fr)  
La présente invention a pour objet un dispositif de gestion de répartition de chaleur dans un appareil de traitement (5) de fils (6) en déplacement sur un moyen de transport (1), le moyen de transport (1) étant apte à être traversé par un flux de chaleur au niveau d'orifices, caractérisé en ce que le dispositif comprend au moins un moyen d'obturation (2) par recouvrement d'au moins une partie des orifices du moyen de transport (1), ce moyen d'obturation (2) étant indépendant du moyen de transport.
