Abstract (en)

A motor cooling system (1) for washing machine comprising a motor (2) adapted to perform a washing operation of the washing machine, and a first pipe (3) wound around an outer surface (4) of the motor, the first pipe (3) is adapted to flow a coolant (5) through it, the first pipe (3) is in heat transfer coupling with the motor (2), such that when the motor (2) is heated due to performance of the washing operation, the motor (2) transfers heat to the coolant (5) flowing through the first pipe (3).
