Abstract (en)
[origin: EP3493170A2] Disclosed is a wireless tamper device ("WTD"). The WTD includes a transmitter, multi-layer probe, processing device, and power supply. The processing device is in signal communication with the multi-layer probe and the power supply is in signal communication with the transmitter and processing device. The processing device includes a processor and a computer-readable medium ("CRM"). The CRM has encoded thereon computer-executable instructions to cause the processor to initiating a tamper state to untampered, detect a physical trigger on the multi-layer probe, and set the tamper state to tampered in response to detecting the physical trigger.
