Abstract (en)

[origin: EP3493534A1] [Object] To provide an information processing device, an information processing method, and a program that can enable more comfortable communication by rendering distances to multiple communication partners by using three-dimensional expression for connection between spaces.[Solution] An information processing device including: a reception unit configured to receive data from a communication destination; a generation unit configured to generate spatial image information placed at a predetermined position in a three-dimensional space by using captured images of a plurality of the communication destinations; and a display control unit configured to perform control so as to display the generated spatial image information on a display unit.
