Abstract (en)
[origin: WO2018024970A1] The present invention relates to a backpack (1) comprising: – a storage envelope (2) with shoulder straps (6), – a rigid cover (30) covering the top of the envelope, – a fixed frame (31) secured to the cover and comprising at least one lower bearing surface (32), – a movable frame (4) that is articulated to the cover or to the fixed frame, with a lower bearing surface (42) and that is able to move between a stowed position and a deployed position, the frames being arranged such that, in the deployed position, the lower bearing surfaces (32, 42) are arranged around the envelope (2) such that the backpack can be placed stably on these lower bearing surfaces, the frames forming the support for the cover.
