Abstract (en)

[origin: WO2018024289A1] The invention relates to an articulated vehicle, for example a rail vehicle or an articulated bus, formed from a plurality of vehicles or vehicle parts (2, 3) connected to one another in an articulated manner, wherein a passage (10) is arranged between the vehicles or vehicle parts (2, 3), wherein the passage has an inner cladding (12) and an outer cladding (14) laterally spaced apart from the inner cladding, wherein the inner (12) and outer cladding (14) are arranged so as to form the spacing (A) relative to one another on the end walls of two adjacent vehicles or vehicle parts, wherein a sound insulation layer (18) can be applied to the free surface (16) formed by the spacing (A) on the end wall.
