Abstract (en)
[origin: WO2018024382A1] An apparatus and process for packaging a product (P) arranged on a support (2) or on a support portion (2') of a continuous support using a packaging assembly (11) configured for tightly fixing a film portion (22) of a plastic film to said support or support portion; a conveyor (3) extends through or in correspondence of the packaging assembly (11) and is configured to move the supports (2) or the support portions (2') inside the packaging assembly (11); a vacuum arrangement (26) is controlled to extract - through the conveyor (3) and through holes in the support or support portion - gas present in the packaging assembly (11) between the film portion (22) and the underlying support or support portion for then forming a vacuum skin packaged product (P).
