Abstract (en)
[origin: WO2018134418A1] The invention relates to an input element (1) for a touch-sensitive screen (20), comprising - a first communication unit (4) for communicating with a control and processing unit (30); - at least two contact surfaces (5) which can be detected by the touch-sensitive screen (20); and - an acceleration sensor (10) for detecting an acceleration of the input element (1). The invention further relates to a method and a computer program for detecting an input element (1) on a touch-sensitive screen.
