Abstract (en)
[origin: US2019177027A1] A labelling device having a label dispenser and transfer device for transferring a row of labels delivered to the transfer device to an article web. The transfer device may include at least one vertically adjustable slide assembly mounted thereon for pressing the labels onto the article web, and the slide assembly may comprise a base plate and a plurality of pressing elements. The slide assembly may further comprise at least one cassette module assembled with the base plate, and one or more of the pressing elements may be arranged on each of the cassette modules.
