Abstract (en)

Described herein is a package for a plurality of products, preferably foodstuff products, even more preferably confectionery products. The package is characterized in that it comprises:- an outer container (2); and- a tray (4), which is provided with a plurality of housings (6) containing said products (P) and is rotatably mounted within said container (2); wherein provided on said tray (4) is an array of game indications (X); wherein said outer container is provided with at least one opening (22, 24) or else an opening (22) and a transparent portion, which is or are configured for rendering accessible a product contained in a housing (6) so that it can be taken out, and for rendering visible from outside an indication (X) of said game; and wherein said tray (4) is provided with a shaped portion (12), which faces, or projects on, the outside of the container (2) and which the consumer can get hold of, and wherein said tray is configured for being rotated, via said shaped portion (12), so as to render accessible a new product (P) and, simultaneously, render visible from outside a new game indication (X), through said at least one opening (22, 24) or else said opening (22) and said transparent portion.
