Abstract (en)
The invention relates to a container (1) comprising a lid part (2) substantially made from a thermoplastic material and comprising a connection portion (5) for connection to a rim of a container part (3) and a lid (4) which is pivotably connected to said connection portion (5) to close in a sealing manner, said connection portion (5) comprising an access opening and a circumferential first flange surrounding said access opening, and an area of said access opening is at least about 50 cm. The connection portion is provided with stacking provisions which enclose said access opening and which are complementary with stacking provisions at the bottom of the container part and the container further comprises a sealing foil attached to an inner surface of the container part with a space provided between the lid and the sealing foil for storing a measuring scoop.
