Abstract (en)

[origin: WO2018028815A1] The invention relates to a cigarette package having an outer package (10) designed as a flip-top box for holding an inner package (11) made of foil, in particular a sealed package, which has upright side seams (39, 40) arranged on inner side walls (36), in a flip-top box having no collar. The inner package (11) is designed having increased dimensional stability because of the arrangement of the side seams (39, 40), which are designed as fin seams, and because of a special structure of a tray, which is arranged inside the inner package (11).
