Abstract (en)

[origin: WO2018029384A1] The invention relates to a method of detecting the IB virus, variant IB80, comprising the steps of a) providing a sample potentially containing the IB virus, variant IB80, b) providing a detection system that detects the S gene of the IB virus, variant IB80, with the nucleic acid of sequence SEQ ID NO: 1 or the product of the S gene of the IB virus, strain IB80, with the nucleic acid of sequence SEQ ID NO: 1 and/or a protein with the amino acid sequence SEQ ID NO: 2, and c) detecting the IB virus, variant IB80, with the aid of the detection system provided in step b), in the case that the sample provided in step a) contains IB virus, variant IB80.
