Abstract (en)

[origin: WO2018028949A1] The invention relates to a household appliance comprising a housing, a control panel (1), which has a touch-sensitive input unit (5) on an exterior surface (2), and comprising a control unit, wherein the touch-sensitive input unit (5) is designed as a touch-sensitive rotary switch and the input unit (5) contains a touch zone (14) applied to the exterior surface (2), the touch zone being mutually opposed to a sensor surface (15), which has a plurality of conductive segments (6), on an interior surface (3) of the control panel (1), such that a touch on the touch zone (14) can be detected on the sensor surface (15). The invention also relates to a method for producing the household appliance and a method for operating the household appliance.
