Abstract (en)
[origin: WO2018138535A1] Procedure for the manufacturing of a multi-component mortar, that in principle consists of three basic components, furthermore by adding additional adhesives and paint materials a mortar mixture with good insulation features will be achieved. Mortar has thermally insulating and fireproof characteristics, dry phase and water-based. Mortar can be laid on the requested surface in a pulpy phase. Treatment of surface is possible with the adequate tools.
