Abstract (en)

[origin: WO2018028885A1] The invention relates to a corner assembly (2) of two insulated glass elements (1a, 1b) butting against each other at an angle, which each have at least two panes (3a, 3b), which are connected to each other by means of a spacing profiled element in such a way that a pane intermediate space is formed, wherein the panes (3a, 3b) of each insulated glass element, which are arranged parallel, have mitered abutment ends in the end region of said panes, which abutment ends are connected to each other by means of a film (4), and the film (4) is provided for connecting the insulated glass elements (1a, 1b) by means of adhesive (6).
