Abstract (en)
[origin: WO2018031058A1] A shock detector system for determining the existence of a harmful electrical condition in a body of water proximate a first shock detector or a second shock detector with the first shock detector providing a danger signal if the harmful electrical condition proximate the first shock detector could injure or kill a person coming into contact with the body of water proximate the first shock detector and the second shock detector providing a caution signal if there is no harmful electrical condition detected by the second shock detector even though there is a harmful electrical condition proximate the first shock detector.
