Abstract (en)

[origin: EP3499479A1] An alarm peripheral (10) comprising a tamper detection element (18) and a housing (12) arranged to be mounted on a surface, the tamper detection element (18) being biased towards a first position and arranged to be displaced away from the first position when the housing (12) is mounted on the surface, the peripheral being arranged to generate an alarm signal in response to the detection of the movement of the tamper detection element towards the first position when the peripheral is removed from the surface.
