Abstract (en)
[origin: WO2018034613A1] The disclosure relates to a guide (20b) adapted to support a container (10) such that the container (10) is movable relative to the guide (20b) along a longitudinal direction (L) of the guide (20b), the guide (20b) comprising an elongated track (21) extending along the longitudinal direction (L), a protrusion (23) at least partly extending in a transverse direction (T1, T2), and a local dilatation (24) at least partly extending in a transverse direction (T1, T2), wherein the guide (20b) further comprises an attachable plug (30) adapted to be attached to the track (21) after mounting of the container (10) on the guide (20b), such that the plug (30) occupies at least a portion of the dilatation (24) and thereby counteracting unintentional manoeuvring of said portion of the container via the dilatation and thereby counteracting the abutment portion from circumnavigating the protrusion. The disclosure also relates to a storage system and to an attachable plug.
