Abstract (en)

[origin: WO2018033407A1] The invention relates to a modular and multipurpose covering device (10) for a pool (1), comprising a first modular covering tarpaulin (20) forming a tailor-made safety covering made up of first tarpaulin elements (21) which are joined together reversibly by transverse supports (30). It further comprises a second modular covering tarpaulin (40), superimposed with the first tarpaulin and made up of second tarpaulin elements (41) which are joined together reversibly by the same transverse supports (30). This second covering tarpaulin (40) affords additional functions that can be modified according to the season. The two end transverse supports (30a, 30b) are coupled to lashing (50) and tensioning (60) means for securing and holding down on the ground (2) the covering device (10) that is arranged over a pool (1).
