Abstract (en)
[origin: WO2018059935A1] The invention relates to a wind turbine (1, 13) having at least one lighting device (5, 14), which has a light source (6) and an emission device (7), wherein the light source (6) and the emission device (7) are arranged at different positions of the wind turbine (1, 13), wherein at least one positioning device is provided which, by means of a positioning section (8), is coupled to the emission device (7) in such a way that the emission device (7) can be moved between a first position and a second position by a movement of the positioning section (8).
